ORDER:

In the letter 1<sup>st</sup> read above, the CE (R&B) CRN & MD, APRDC, Hyd., has stated that Huzarabad – Parkal road is an important Corenet road in Warangal District connecting Bhupalapally town in Warangal, Ramagundam and Godavarikhani towns in Karimnagar District. Both Bhupalapally and Ramagundam are industrial towns in Telangana area, and also headquarters for Singareni Collieries companies and thermal power plants like NTPC and APGENCO.

2. He has further stated that the road from Km 30/5 to 32/4 is in Parkal town limits, which was recently upgraded as Municipality, and there is a heavy floating population from surrounding villages as the Parkal town is the only place for procuring fertilizers, pesticides and other daily needs of the people. Due to the heavy floating population the road is very congested and number of accidents are taking place. The recently converted National Highway No.363 i.e., from Sironcha to Atmakur also joins Parkal town at Km 32/4. The existing carriageway from Km 30/0 to Km 30/6 is of 7.0 m wide, Km 30/6 to Km 32/0 is of 10.0 m wide and from Km 32/0 to Km 32/4 is 14.0 m wide. The year of last renewal to the road is 2007-08. Hence, it is necessary to widen the existing road in Parkal town limits to four lane road to avoid traffic congestion and accidents. Therefore he has proposed to widen the carriageway to 8.5 m width on either side with central median of 1.5 m and also strengthen the existing road as the road is ripe for renewal. The traffic intensity on this road is 2503 CVPD. The estimated cost of the subject work is Rs.485.00 lakhs. The subject work doesn't involve any land acquisition and shifting of utilities.

3. In the letter 2<sup>nd</sup> read above, the S.E(R&B), Warangal, has also stated that the parkal town limit is having a length of about 4.00 Kms out of which the Core Net Road is having a length of 1.90 Km i.e., from 30/5 to 32/4. The existing width of roads are as follows:

30/5 to 30/6	i.e., 100 mts. = 7.00 mts c/w
30/6 to 32/0	i.e. 1400 mts. = 10.00 mts c/w
32/0 to 32/4	i.e. 400 mts. = 14.00 mts c/w

4. He has further stated that the proposed width of 4 lane road with 8.5 mts c/w on either side with 1.5 mts median therefore the 14 mts c/w is proposed for widening to just 2.1 mts. duly utilizing the 14 mts c/w to have uniform width of 4 laning road with 1.5 mts median.
